PREFACE

The Personnel of the Naval Shore Establishment (PONSE) is designed to assist Department of the Navy managers in analysis of appropriate work force requirements and planning for future resource needs. Although the figures and statistics are generally accurate, they should not be used for ceiling reports or budget justifications without verification.

The PONSE is published periodically and provides a statistical review of Navy-wide population data as well as studies of specific subgroups of the civilian and military population ashore.

Questions about the data, specific suggestions for special reports, additions/deletions to the distribution list, and general comments on the PONSE should be directed to: Office of the Chief of Naval Operations (OP-140F), Navy Department, Washington D.C. 20350.

INTRODUCTION

The data contained in this report have been derived from data files located in the Analysis and Research Unit, Work Force Information Section (OP-140F), Personnel Management and Evaluation Branch, Civilian Personnel Policy Division, Office of the Deputy Chief of Naval Operations (Manpower, Personnel and Training). The data were obtained from the following sources:

- Personnel Automated Data System (PADS)
- Computer Assisted Manpower Analyses System (CAMAS)
- Recurring or one-time special reports

Civilian personnel data cover full-time direct-hire civilian employees in the United States, territories and foreign countries unless otherwise designated. The data exclude the following categories: those on leave without pay for scheduled periods longer than 30 days; persons carried in any kind of leave status after the last day of active duty as specified in a reduction-in-force notice; persons on leave with pay pending disability retirement; disadvantaged youths under the Stay-in-School Campaign and the Summer Aid Program; Public Service Career employees; employees in developmental jobs; persons working without compensation; and persons serving at \$1.00 per year.

Navy military personnel data at those activities which employ civilians have been compiled from data furnished by the Naval Military Personnel Command.

The data displayed in this report are formatted so as to be usable by the reader. However, certain precautions should be observed when extracting or combining information or statistics from various tables and charts. Since several data bases have been utilized, each having a unique composition, some internal inconsistencies may occur.

The reader should take care to note the descriptive headings of all charts and tables and avoid combining or comparing those based on separate source data and/or populations.

Figures in all the charts and some of the tables have been rounded for clarity and have been so indicated.

TRENDS IN CIVILIAN EMPLOYMENT

(Figures have been rounded for clarity)

TOTAL DEPARTMENT OF THE NAVY DIRECT HIRE WORK FORCE

In addition, there were 10,700 indirect hire foreign nationals at commands and activities located outside the United States. Since the September 1981 edition of the MGR, there has been little change in the overall ratio of General Schedule/General Manager or similar (GS/GM) and Federal Wage System or similar (FWS) employment. GS/GM employment represents 50 percent of the direct hire work force. Civilian employment levels for Marine Corps are included in the above data. The following employees are excluded from the 30 September 1982 employment data:

Federal Junior Fellowship Program Employees	323
Stay-in-School Employees	3,024
Severance Aids	1,300
Worker Training Opportunity Program Employees	812
TOTAL	5,459

These are civilians hired under special programs and are not subject to statutory ceiling limitations. Additionally, those on sick leave pending separation or disability retirement have been excluded from the above count.
